// summary

Aspiring Junior Developer and fourth-year Computer Science student with a strong interest in programming education and practical applications of technology. Experienced in hands-on projects that utilize machine learning, web development, and systems design to address real-world challenges. Eager to leverage skills in software development and contribute to meaningful tech solutions.

// experience

Developer @ JRD Malls

August 2025 → December 2025

- Engineered a comprehensive online shopping system that streamlined customer transactions and enhanced user experience
- Developed an administrative interface to manage backend operations effectively, improving overall operational efficiency
- Implemented a courier system that optimized delivery processes, facilitating timely order fulfillment
- Collaborated with a team to integrate payment gateway solutions, ensuring secure financial transactions

Developer @ Muay Thai Strike Classification

January 2026 → June 2026

- Created a visual machine learning model capable of identifying various strikes in Muay Thai.
- Conducted extensive data collection and preprocessing to ensure high accuracy in strike classification
- Utilized programming skills to design user interfaces that visualize classification results effectively
- Presented findings and model demonstrations in academic settings, enhancing understanding of machine learning applications

// skills

Programming Languages = [JavaScript, Python]

Web Development = [React, Node.js]

Machine Learning = [TensorFlow, Scikit-learn]

System Design = [API Development, Database Management]

Project Management = [Agile Methodologies, Collaborative Tools]

Media Editing = [Photoshop, Premiere]

// education

Bachelor of Science, Computer Science — Fullbright College Inc. 2027

// additional

Skills: Web Development, Machine Learning, System Design
